## INTRODUCTION

In 1997, the Legislature enacted a plan devised by Governor Foster that reinforced the Board of Regents' role as Louisiana's policy-making and coordinating board for all postsecondary education. This initiative also reaffirmed the responsibilities of the state's postsecondary education systems and their management boards. As a result, we now have a coordinated system based on shared governance.

This has proven to be a workable governance structure that has brought together the entire postsecondary community. Data contained in this report affirm the efforts of postsecondary educators to provide Louisiana citizens greater access to quality programs. It also underscores the need to maintain efforts to support the postsecondary education enterprise, and to continue to promote accountability within the system. Institutional, as well as statewide data, are presented in this report. Used in combination with performance indicators identified in Strategic and Operational Plans (developed in compliance with Act 1465 of 1997), along with the General Performance Information provided in the annual appropriations bill, a more thorough understanding of accountability efforts in postsecondary education is obtained. On behalf of the Board of Regents and Louisiana's postsecondary education community, we are pleased to submit The 2000 Accountability Report.

Mary Ella Sanders, M.D.  
Chair, Board of Regents

E. Joseph Savoie, Ed.D.  
Commissioner of Higher Education

## NOTES

- ~ On July 1, 1999, the Louisiana Community and Technical College System was implemented, placed under a new management board and integrated into Louisiana's postsecondary education system under the aegis of the Board of Regents. The Board of Regents recognizes the important and emerging role of the Louisiana Technical College, and is working to fully integrate these campuses into its databases. This effort is not yet complete. Therefore, data for the campuses of the Louisiana Technical College are included in this report, but appear in a separate section. The data were provided by the Louisiana Community and Technical College System office and are unable to be merged with the other campus data at this time.
- ~ At the beginning of each section of this report, there are a select number of bulleted highlights. These serve to summarize salient information and address statewide trends only. Information on individual campuses is also provided in each section.
- ~ Most of the tables refer to public **Higher** education. This is to distinguish the traditional degree granting two- and four-year institutions from the campuses of the Louisiana Technical College (LTC). Where data for LTC are included, the terminology **Postsecondary** education is used.
- ~ River Parishes Community College (RPCC) commenced operation in Fall 1999. Therefore, data for RPCC appear only in those tables which reflect 1999 data, where available.

## MAP OF PUBLIC HIGHER EDUCATION INSTITUTIONS

# MAP OF LOUISIANA

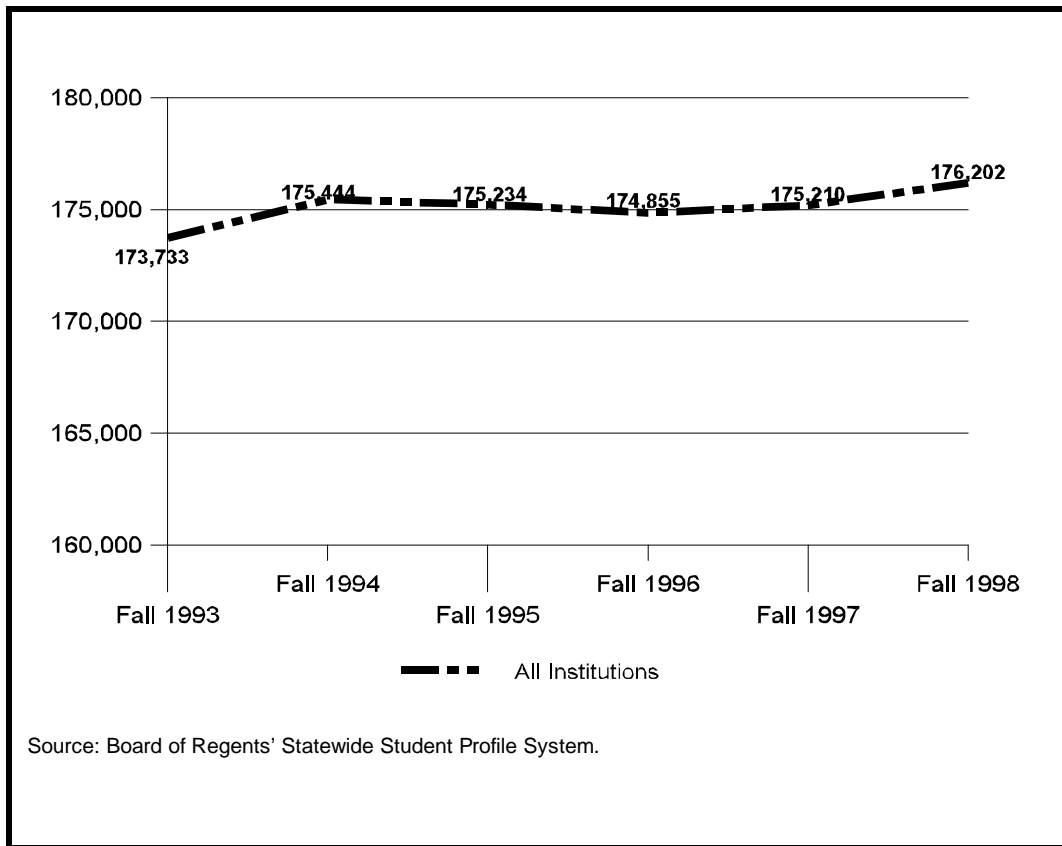

## COMMUNITY & TECHNICAL COLLEGE CAMPUSES

# ENROLLMENT TRENDS

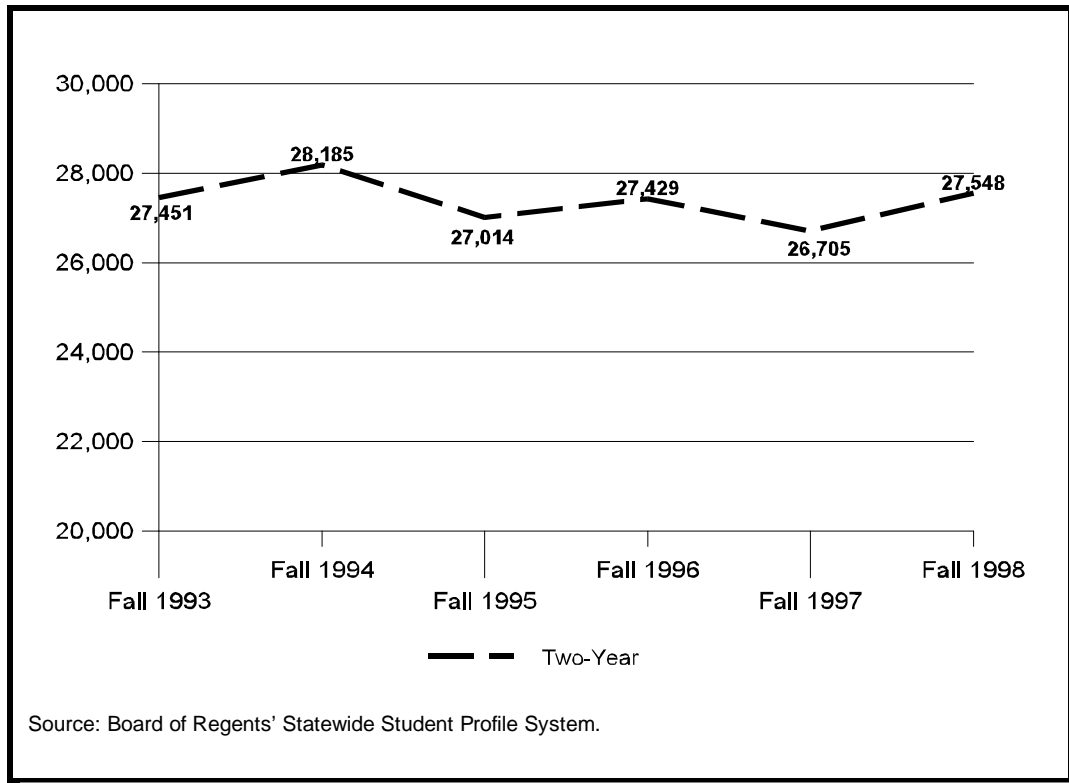

- ~ Enrollment in Louisiana public higher education increased slightly between 1993 and 1998. In Fall 1993, 173,733 students were enrolled as compared to 176,202 in Fall 1998.
- ~ With regard to the age of the student population, the under 24 age category experienced the largest numerical increase, from 110,188 in 1993 to 115,505 in 1998, an increase of 5,317. This age group continues to represent the large majority (65.6%) of college students.
- ~ Females continue to represent a growing majority of students enrolled in Louisiana public higher education, 57.4% in 1993 and 59.3% in 1998.
- ~ While white students enrolled in Louisiana public higher education declined by 4.3% between 1993 and 1998, black and other race students increased by 13.6% between 1993 and 1998.
- ~ Approximately nine of every ten undergraduate students enrolled in Louisiana public higher education are residents of the state, constituting 91.4% of undergraduates in 1993 and 91.9% in 1998. At the graduate level, Louisiana citizens constitute a large majority of the student enrollment, 78.6% in 1993 and 80.1% in 1998.
- ~ Enrollment of out-of-state students in Louisiana has declined by 11.4% between 1993 and 1998.
- ~ A declining majority of students enrolled in Louisiana's public two-year colleges enroll on a part-time basis, 58.6% in 1993 and 51.0% in 1998. Part-time students continue to make up approximately  $\frac{1}{4}$  of student enrollment (25.9% in 1993 and 24.1% in 1998) at four-year institutions.

# PROGRAM VIABILITY

- ~ The Board of Regents recently completed a year long review of program accreditation. This review resulted in academic programs being categorized in one of three designations: mandatory, recommended and optional.
- ~ In Louisiana public higher education, 83.1% of all mandatory and recommended programs are currently accredited.
- ~ The Board of Regents' Distance Learning Initiative (BORDLI) was designed to deploy technology to meet three goals. The goals are:
  - 1) to eliminate needless duplication of academic programs;
  - 2) to deliver unique academic programs, otherwise unavailable to citizens due to barriers of time and/or distance; and
  - 3) to produce a positive impact on economic development through improving access to quality education in Louisiana.
- ~ Every Louisiana postsecondary education campus has the capacity to offer courses by distance learning through at least one of the four methods of delivery: satellite, internet, compressed video, and audiographics.
- ~ Presently 71.4% of Louisiana public postsecondary education campuses have the capacity to utilize satellite as a classroom and administrative tool; 54.3% have similar internet capability; 51.4% have compressed video capability; and 7.1% have audiographic capability.

# FACULTY TRENDS

- ~ There is a relatively even distribution of faculty by rank among Louisiana public higher education institutions. Professors comprise 25.2% of the total full-time faculty, associate professors 23.9%, assistant professors 28.7% and instructors/ lecturers/others 22.2%.
- ~ Approximately half (49.4%) of the total full-time faculty in Louisiana's institutions of public higher education are tenured. An additional 21.9% are employed in tenure track positions.
- ~ Despite modest increases between fiscal year 1998-99 and 1999-00, Louisiana average faculty salaries remain below the SREB average across all ranks and institutional classifications.

# **Tuition Rates and Tuition Opportunity Program for Students (TOPS)**

- ~ In-state tuition and fees have remained relatively stable for the past three years. At two-year colleges, current in-state tuition and fees range from \$1,056 to \$1,286 annually. At four-year institutions, current in-state tuition and fees range from \$1,724 to \$2,881.
- ~ In response to a legislative mandate, out-of-state tuition and fees have increased over the past three years. At two-year colleges current out-of-state tuition and fees range from \$2,300 to \$4,266. At four-year institutions, current tuition and fees range from \$5,463 to \$8,078.
- ~ Since 1998, the Louisiana Office of Student Financial Assistance has processed a total of 70,932 applicants for TOPS. Awards were disbursed to 23,402 students in academic year 1998-99 and to 28,876 students in 1999-00.

*\* The information included in this section was provided by the Louisiana Community and Technical College System. Questions concerning this data should be directed to the LCTC System.*

# **Louisiana Community And Technical College System Information**

The Board of Supervisors for the Louisiana Community and Technical College System (LCTCS) was created by a constitutional amendment approved by the voters in November 1998 and the enabling legislation approved by the Legislature in November 1998. It is composed of 15 members appointed by the Governor with consent of the Senate, two from each of the seven congressional districts with one at-large member. Each of these members serves overlapping six-year terms and is constitutionally required to be representative of the state's population by race and gender to ensure diversity. Additionally there are two student members--one selected by and from the membership of a council composed of the student body presidents of the community colleges-- and one student selected by and from the membership of a council composed of the student body presidents of the Louisiana Technical College under the supervision and management of the LCTCS Board. Each student member serves a one-year term.

The System includes programs of public postsecondary vocational/technical training--the Louisiana Technical College with its 42 campuses--and the seven community colleges--Baton Rouge Community College, Bossier Parish Community College, Delgado Community College, Elaine P. Nunez Community College, River Parishes Community College and South Louisiana Community College--that offer associate degrees but not baccalaureate degrees. A new community college under the LCTCS Board--Delta Community College--has been authorized by the Legislature for Northeast Louisiana and planning has begun. The Board of Supervisors of the Louisiana Community and Technical College Board exercises all supervisory power to direct, control and manage the institutions that comprise the System. (Louisiana Constitution of 1975, Art. VIII, Sec. 7.1).

- ~ 50 campuses statewide
- ~ Enrollment totals of 45,652
- ~ Average faculty salaries, LTC--\$30,352: SREB average--\$36,862
- ~ Average faculty salaries, community colleges--\$33,528:  
SREB average--\$38,777
- ~ Programs designed to meet labor market demands provide avenues for retraining and upgrading employees' skills
- ~ Contracts can be developed between the community colleges, LTC campuses and area employers to design and deliver company and job specific learning for incumbent workers
- ~ The economy is producing an abundance of jobs that require more than a high school diploma but less than a four-year degree

## **A Sustained Investment in Postsecondary Education Is Vital to the Future of Louisiana**

Over the last four years, postsecondary education in our state has continued to deliver a single message -- the social and economic prosperity of our people and our state depends upon a vibrant and engaged postsecondary education system. Education is essential because it empowers people to provide for themselves, their families and communities. Education -- and the higher the level, the higher the benefit -- is essential to a more productive, safe and better future for Louisiana.

Fifty or sixty years ago, postsecondary education in the South was pretty much the same from North Carolina to Texas. The South could boast of some good public universities but very few were world class institutions. The South lagged far behind the rest of the nation in practically every aspect of life, except in poverty and human deprivation. Conditions were so bad that President Franklin Roosevelt claimed the South was the "nation's No. 1 economic problem."

Louisiana desperately needs the benefits that education can provide. Education is a direct investment in the future of the people of a state because the benefits of education have a massive impact on critical problems that plague a state -- particularly a relatively poor state like Louisiana. State government has no greater responsibility than to provide for the health, security and prosperity of its people. Education affects each of these.

Louisiana is making progress. Since fiscal year 1996-1997, postsecondary education has received a *31.5 percent increase in funding*. This is among the most impressive increases in funding to postsecondary education in the nation. Yet, Louisiana still remains last in the South in state funding. In 1999, Louisiana's appropriation to postsecondary education was about \$250 million below the Southern average. Clearly, there is still a long way to go.

In the last few years, Louisiana's leaders have begun to realize that the future quality of life in our state -- economically, socially and culturally -- is directly linked to the quality of our educational enterprise. If support is maintained for our reform efforts, the future of postsecondary education in Louisiana will be even be better and thus help bring about broader opportunities for the people of our state.

Louisiana simply must invest more in the capacity of our people to be more self-sufficient and productive. Governor Foster was right on target in his recent inaugural address when he said : *We destroy poverty by destroying ignorance. We destroy ignorance by educating our people. There will be no retreat and no surrender to ignorance... no retreat, no surrender on education. It takes more training and a greater education for people to make... improvements in their lives....*

This public document was published at an annual cost of \$9,793.20 or approximately \$19.59 per copy by the Board of Regents, 150 Third Street, Suite 129, Baton Rouge, LA 70801-1389, as required by law for the purpose of keeping the citizens of Louisiana informed on the progress of postsecondary education. This material was printed in accordance with the standards and provisions for printing by state agencies established pursuant to R. S. 43:31.
